## Printing/Faxing/Storing

This sequence illustrates how a document can be printed, faxed or converted to an image document (such as a TIFF tagged image file format document) and stored.

After creating the document in ANY Windows application, the user selects the "Print" option from the "File" pull-down menu (such as the "File" menu above). A print dialog box is presented to the user, and depending on the function selected, the document is printed, faxed, or converted and stored in the TKP Manager's "In-box".

**Note**

As you requested in our phone conversation today, I am sending you information about our brass worm gears. I have included a price list along with pages from our catalogue.

A full catalogue is on its way to you, and I have added your name to our mailing list.

I hope this information meets your needs. Call if you have further questions or to place an order.
